

# **Kaiser Permanente The Difference- Kaiser Permanente®**

Speaker 1:

Most health plans don't give you the facts you need to make informed healthcare choices. But with Kaiser Permanente, you and your doctors share the information that makes it easier to live healthier. You can view x-rays and lab results, get appointment and prescription refill alerts, so you don't have to remember everything, all from your smartphone, tablet, or computer. If you want to be the one to decide when and where your healthcare is delivered, you've come to the right place. Kaiser Permanente doctors will make virtual house calls via your smartphone or tablet, or they'll meet with you in person if you and your doctor decide that's best.

You've got lots of people and things to take care of every day, and you can't be in three places at once. So Kaiser Permanente is with 24/7 access to a nurse's advice line, urgent care, online appointment setting, automated text reminders, the care you need, and convenience you demand are always at hand. Like everyone else, you want to live healthier, but that's where the similarities end. That's why Kaiser Permanente delivers your care, your way. Whether you're setting appointments, getting medical advice at midnight, or connecting with your doctor from anywhere, you can manage your healthcare from your favorite device. You might say that Kaiser Permanente gives you one of a kind healthcare, visit [kp.org](http://kp.org) to learn more.
