

Why Kaiser Permanente (Mid-Atlantic) - Kaiser Permanente®

Speaker 1:

Healthcare has a lot of moving parts, doctors visits, lab test, referrals, diagnosis, prescriptions, and treatment to name a few. Kaiser Permanente Medical Centers are built to simplify things by delivering quality, convenient, and customized care. To begin with, we combine healthcare and health coverage in one convenient plan, and our medical centers combine everything you need in one place. So you can see your doctor get tests done and pick up your prescriptions all in one trip. It's an integrated system that offers you four critical advantages that other health plans can't match. Our board-certified physicians, pharmacists, and other providers work together to keep you your healthiest. Your whole team is connected to your health records. So they're all up to speed on your medical history, whether you've seen them in person or virtually. That means you don't have to answer the same old medical questions every time you see a new doctor.

You can take your pick from our award-winning board-certified primary care physicians who are focused on preventative care that's designed to keep you your healthiest. If you need to see a specialist for a complex condition, your primary care provider will connect you with the specialist you need, and partner with them in delivery care that's rated in the top 1% in the nation. If you don't have time for an in-person visit, you can visit your doctor, order prescription refills, get 24/7 medical advice from our nurse advice line, and more right from your tablet or smartphone. Our doctors have the authority to make healthcare decisions based solely on what's best for you, without interference from an insurance company. So you can feel confident you're getting the quality, convenient, and customized care you deserve every time you visit. Visit kp.org/newmasfacilities to learn more.
